Schedules (lukkarit)

Address

lukkarit.metropolia.fi

Purpose

Schedule machine is used for publishing schedules. The machine is actually a search engine that gathers scheduling information from room reservation system. So if you cannot find a specific schedule it's probably because it's not made yet or because there is no room reservations made for selected student groups/study implementations.

Permissions

Everyone has access to lukkarikone but to save schedules you must be logged in with Metropolia username/password.
