

# Maintenance on Metropolia's telecommunications systems and data center systems on 27.-29.11.2020

We will perform maintenance work on Metropolia's telecommunications systems from Friday, November 27, 2020 at 4:00 pm until Sunday, November 29, 2020, which will result in short outages for the entire Metropolia telecommunications environment. The subject of maintenance work is Metropolia's infrastructure network equipment, due to which outages occur both in the campus network and in the services provided from the data center.

Metropolia's data center systems will also be serviced from Saturday, November 28, 2020 at 8:00 pm until Sunday, November 29, 2020, which will result in short outages for most of the IT services offered by Metropolia, e.g. financial and personnel management systems, e-mail, Skype For Business, web disks (Z, U, W, T, S, P), O365 logins, desktop virtualization (desktop and securedesktop), Web services for teaching and projects, e.g. users, vhost, mysql, mysqlproj, projects servers, [wiki.metropolia.fi](https://wiki.metropolia.fi), [www.metropolia.fi](https://www.metropolia.fi), [moodle.metropolia.fi](https://moodle.metropolia.fi).
