

Breaks in IT services Sat 12th June

Metropolia's servers will be under maintenance Sat 12th June 2021 from 9 am. to 24 pm. The maintenance will cause short breaks to whole server environment.

The maintenance will cause breaks to most of the services provided by Metropolia. For example: Financial and personnel systems, e-mail, Skype for Business, Network Drives (Z, U, W, T, S, P), logging in to Microsoft Office 365, virtual desktops (desktop and securedesktops).

Please prepare yourself to breaks also in other IT services.

We try to keep the breaks and lags caused by the maintenance as short as possible.

We apologize the short time of notice. We are announcing about the breaks always as soon as we are able to know that maintenance will be necessary.

Kind regards
Helpdesk
