

# New application for students - Touch!

Metropolia Touch application is developed for students by Metropolia IT services. It can be found in campus lobbies. In the application, students can easily find today's information. This can be for example group schedules or today's menu.

Application that can be used throughout touch screen device includes following information:

- Campus events
- Staff contact information
- Schedules
- Available Computer classrooms
- Menus
- National and international news
- Public transportation timetables

Application and the touch screen devices are already installed and operational in Leppävaara, Tikkurila and Myyrmäki campuses. Application and devices will also be installed in Bulevardi and Tukholmankatu campuses in August. If the application have an successful launch and it will be approved by students its usage will be extended also to other Metropolia campuses.
